VIXXI Solutions' Advanced E911 Technology Offers Telecommunications Providers a Minimum 20% Savings

Efficient, IP-based Architecture Answers the Market's Need to Reduce Costs, Exceed Service Expectations

GREENWOOD VILLAGE, Colo., October 20, 2008 – VIXXI Solutions is responding to the needs of telecommunications providers looking to reduce costs and enhance service. VIXXI's innovative, comprehensive E911 technology provides immediate relief to the bottom line. Simultaneously, VIXXI offers Next Generation benefits that differentiate the service provider in a market that is more competitive than ever.

"In these uneasy economic times, our efficient Next Generation solution is an obvious choice because of its ability to provide direct and indirect cost savings to any type of telecommunications provider," said Christopher J. Camut, Chief Executive Officer of VIXXI Solutions.

VIXXI uses the technology of the Internet to reduce cost per telephone number for any CLEC, ILEC, wireless, VoIP, or telematics provider. The comprehensive solution cuts time and resource expenditures and is Next Generation compliant. The architecture is scalable, supporting feature and functionality growth on a single platform for all emerging applications, including E911 text messaging and mobile user address identification. The entire US and Canada are covered and new subscribers can be turned-up instantaneously, reducing time-to-revenue.

In order to take advantage of VIXXI's progressive solution and associated cost savings, contact info@vixxisolutions.com.

About VIXXI Solutions, Inc.

VIXXI Solutions is a nationwide 911 service provider covering the end-to-end architecture of emergency communications, including service order processing, ALI updates, MSAG management, geo-spatial lookup, call routing, and delivery of precise location information to the PSAP. In addition, VIXXI's patented hardware solutions provide a comprehensive VoIP answer for both small and large PSAPs. VIXXI's efficient technology easily integrates with both legacy and Next Generation environments, quickly driving cost savings for customers and increasing the effectiveness of the nation's public safety system.
