Spatial Data Announces OEM Relationship with Emergent

New Initiative Will Enable 9-1-1 Compliance Capabilities for Emergent's Award Winning ENTICE Platform

IRVING, Texas. – October 7, 2005. Spatial Data Inc., majority owner of Vixxi Solutions, Inc., announced today that Emergent Network Solutions, Inc. has selected Spatial Data's embedded VixxiLink E911 VoIP solution for Emergent's Network Telecommunications Infrastructure Control Environment (ENTICE) software to enable compliance with current and present E9-1-1 regulations. The VixxiLink solution covers every square inch of the United States, making its E9-1-1 data among the most comprehensive and reliable in the industry.

VixxiLink is an extension of Spatial Data's PSAP Database, which been in service for private industry since 1993 and was developed in conjunction with the National Emergency Number Association (NENA). The service not only provides call routing, but also customer MSAG validation and pseudo-ANI generation for number portability.

"We are very pleased to have a top-tier company such as Emergent select VixxiLink as their preferred OEM solution", said Richard A. Peters, President. "This will allow Emergent's VoIP customers to set up E911 services in a short timeframe with minimal effort.

ENTICE is designed to interface with new or existing networks to provide control services and a software foundation for layering new services. The ENTICE portfolio will be expanded to include a new software module called **ENTICE E911** which will enable a quick, easy and accurate connection to the nation's E911 network.

"We wanted to select a solution that gave our current and future customers the very best and most reliable E9-1-1 data available, but also to have deployment be quick and efficient to ensure their competitive edge in the VoIP market," said Nathan Franzmeier, CEO of Emergent. "VixxiLink provides this."

About Spatial Data, Inc.

Spatial Data's revenue-enhancing spatial applications have been provided to industry-leading firms including Fortune 500 clients since 1988. Based in Irving, Texas, Spatial Data provides full sales, technical support, application development and training services for GIS providers including MapInfo and ESRI, specializing in enterprise-wide Internet and Intranet development projects.
