Public Safety Hot for Denver

E911 Company Calls the Mile High City Home

GREENWOOD VILLAGE, Colo., September 25, 2008 – Vixxi Solutions, a nationwide Enhanced 9-1-1 (E911) provider, announced plans today to relocate the company's corporate headquarters from Dallas to Denver in order to leverage the city's strong emphasis on public safety. This move comes on the heels of the Democratic National Convention, promising that politics aren't the only hot topic in Denver.

"This is a strategic move to align ourselves with a city heavily focused on public safety consciousness," says Christopher Camut, CEO of Vixxi Solutions. "From a sales and recruitment perspective, Denver is an excellent place to support our growing business. Dallas will continue to be the core of our technical presence."

Vixxi participated in the Mile High region's 9-1-1 Summit, sponsored by the Public Utilities Commission and Colorado Resource Center on Sept. 11. The summit explored how emergency call centers in Denver and the rest of the state can take advantage of next generation technology from companies like Vixxi. Miranda Peters, Vice President of Operations at Vixxi, spoke at the event regarding the state of the industry and next steps that PSAPs can take toward building stronger 9-1-1 infrastructure.

Denver Metro is also home to Level 3 communications whose partnership with Vixxi Solutions highlights an intense interest from the area's telecommunications companies to keep people safe.

About Vixxi Solutions

Vixxi delivers nationwide, internet-enabled E911 solutions, providing seamless services for all networking environments anywhere, anytime on any device. These flexible solutions expedite time-to-deployment of E911 services, integrate with both legacy and IP-based technologies and enable regulatory compliance with minimal investment. Vixxi complies with all regulatory standards including NENA's i1 and i2 and the IP-Enabled Voice Communications and Public Safety Act of 2007. For more information, visit www.vixxisolutions.com
