FOR IMMEDIATE RELEASE

XO Communications Selects VIXXI Solutions as E911 Provider for VoIP Solution

VIXXI Solutions' Geospatial, IP-Based Technology Aligns with XO's Robust VoIP Capabilities

GREENWOOD VILLAGE, Colo., October 20, 2008 – XO Communications today announced a new referral agreement with VIXXI Solutions, a Next Generation E911 provider, in which XO will refer current and future XO VoIP customers to VIXXI as an E911 provider. VIXXI was chosen because their IP-based, geospatial technology is ideal for VoIP vendors who are required by the FCC to provide their customers with an E911 Solution that identifies caller location information and correctly routes emergency calls to the appropriate PSAP.

XO considered several critical factors when establishing this relationship for an E911 provider including speed of deployment, cost-effectiveness, flexibility, scalability, and compliance. VIXXI uses the technology of the Internet and geospatial routing to turn-up customers instantaneously, improving speed-to-revenue, and to provide competitive per-user pricing. Also, the VIXXI web portal supports real-time location updates of nomadic VoIP users, and location detail can be tied to any data element; it does not need to be tied to a telephone number. VIXXI makes dynamic updates to PSAP boundary changes for accurate call-routing. The architecture is scalable, supporting feature and functionality growth on a single platform. The entire US and Canada are covered and the solution exceeds suggested FCC standards and is i3-ready.

XO's Wholesale VoIP Services

XO offers VoIP Origination and Termination services nationwide. Traffic is routed via XO's award-winning 1.2 Terabit, MPLS-enabled intercity transport network. Customers can select from multiple interconnection options, including private session border controller access, dedicated internet access, public internet, or a traditional TDM interface. In addition, XO offers VoIP Origination customers a customized Enhanced Service Provider Interface ("ESPI") for telephone number management, including requesting Local Number Portability, Directory Listing, and Caller ID with Name. XO has one of the industry's largest VoIP and softswitch networks. The quality of the network, along with competitive pricing, has been the reason XO continues to be a vendor of choice for top carriers.

About VIXXI Solutions, Inc.

VIXXI Solutions is a nationwide 911 service provider covering the end-to-end architecture of emergency communications, including service order processing, ALI updates, MSAG management, geo-spatial lookup, call routing, and delivery of precise location information to the PSAP. In addition, VIXXI's

patented hardware solutions provide a comprehensive VoIP answer for both small and large PSAPs. VIXXI's efficient technology easily integrates with both legacy and Next Generation environments, quickly driving cost savings for customers and increasing the effectiveness of the nation's public safety system.

About XO Communications

XO Communications, a subsidiary of XO Holdings, Inc. (OTCBB: XOHO), is a leading nationwide provider of advanced communications services and solutions for businesses, enterprises, government, carriers and service providers. Its customers include more than half of the Fortune 500, in addition to leading cable companies, carriers, content providers and mobile network operators.
